Dear FCC Members,
I am respectfully requesting the ability to have more listening choices available. This means that it is imperative that you deny the NAB's petition 04-160 and continue to allow listeners the choice of listening to regular AM or FM stations AS WELL AS the choice to listen to satellite radio. If I so choose to pay for the services I get then so be it. I have found satellite radio to guarantee the music that I would like to listen to! This truly should be my choice. Competition has always been great for the consumer so I again implore upon you to deny NAB's petition 04-160.

Thank you,
Joe Ferrucci
